CARE AND MAINTENANCE/SOINS ET MAINTENANCE

After use, your shower should be cleaned with soap and water. This is particularly important in hard water districts where insoluble lime salts may be deposited and allowed to build up. Cleaners of a gritty or abrasive nature should not be used. Care should be taken to avoid contact with strong chemicals such as organic solvents and strippers. Glass cleaners can be used but with caution, if in doubt contact the manufacturer of the cleaner in question. Please keep these instructions for aftercare and customer service details.

L'eau et le savon doivent être utilisés pour nettoyer les verres des portes. Ceci est particulièrement important dans les secteurs où il y a de l'eau dure où des sels insolubles pourraient s'accumuler sur le verre. Les nettoyeurs abrasifs ne doivent pas être utilisés. Des précautions doivent être prises pour éviter tout contact avec des produits chimiques puissants tels que des solvants et des décapants. Un nettoyeur pour vitres peut être utilisé, mais avec prudence, en cas de doute, contactez le fabricant du nettoyeur pour vitres. Veuillez conserver ces instructions pour l'entretien et les détails de service à la clientèle, si nécessaire.
